

Aerial Imagery Boosts Your Solar Business

Solar is helping transform the energy industry. Nearmap's high resolution aerial imagery is fueling that transformation. Today, solar companies are using Nearmap to prospect more efficiently, manage large projects remotely, develop breathtaking proposals and improve the design and implementation process.

Prospect – Prospect Efficiently with PhotoMaps™

Interested in rapid business development without having to spend countless days on the road? Nearmap provides current, clear aerial imagery in the cloud. You can scan thousands of homes quickly – all from the comfort of your office. Using built in tools and imagery that shows change over time, estimators and installers get all the information they need to identify optimal prospects and create accurate quotes.

Design – Rely on Current, Clear Imagery to Drive Your Business

Tired of the guesswork that comes with outdated aerial imagery? Does your current approach lack the clarity needed to get the job done? With Nearmap, you get much better resolution than satellite imagery and unparalleled accuracy when measuring distances and calculating areas for solar panels. With our solution, solar installers place virtual solar panels on the roof and measure energy output and shaded areas. Why take unnecessary risks and lose time when Nearmap provides imagery and tools to drive your business.

Monitor – Track Progress, Ensure Deadlines are Met

Customers can be demanding. With Nearmap, your business will exceed expectations from initial bids to completed projects. Nearmap's historical timeline tool allows solar professionals to monitor large, complex projects as they progress. Our easy to use MapBrowser™ has built in tools that show split views at different points in time. Users can visualize seasonal changes and track progress using side-by-side "before and after" comparisons.

HIGH-RESOLUTION, TIMELY IMAGERY WITH

\$0 INCREMENTAL IT COST

- Prospect faster than ever before
- Estimate jobs remotely creating clear proposals
- Build accuracy into your quotes with high-res imagery
- Reduce risk and manage projects more efficiently

"We transformed our business with Nearmap, allowing us to save time and increase profits right away – all from the cloud."

*– VP of Sales –
US Based Solar Company*

Current. Clear. Change.

Today, Solar installers are gaining a competitive advantage with Nearmap. Sales and project management has changed for the better with Nearmap's high-resolution aerial PhotoMaps™. Now you can visualize your sites from your desktop, tablet or mobile device. Solar companies have quickly recognized how to increase sales, profits and lower risk with Nearmap.

Amazing High Resolution

Our imagery is better than 2.8" GSD—much clearer than satellite imagery—giving you unrivaled clarity, precision and detail.

Imagery Updated Regularly

We regularly update imagery within days of capture. See changes over time by comparing current and historical imagery.

Powerful Integration

Combine Nearmap's spectacular imagery with powerful analytics using our simple and seamless integration with GIS and CAD tools.

100%
CLOUD-BASED

Instant access
from your desktop
or mobile device.

Nearmap Integrates with your existing PV design and work flow tools

Access to the most current imagery on the market provides unparalleled confidence for your business and customers. All of our imagery is reliably available in the cloud. Your entire team can access and share PhotoMaps™ instantly. We integrate with popular GIS and CAD programs allowing you to leverage existing design work flows and maximize productivity.

See your world from a new perspective.
