

HD AERIAL MAPS POWER SOLAR

Improve your quote precision and accuracy with frequently updated Nearmap imagery.

REVEAL ROOF SHADING

View both current maps and all historical captures

PROSPECT WITH POWER

Are you stuck in your truck? Scan thousands of homes or businesses quickly – all from the comfort of your office. Nearmap's frequently updated, HD aerial imagery helps swiftly identify prospects. Work within MapBrowser, or integrate with leading PV platforms.

ESTIMATE WITH PRECISION

Does your current approach lack the clarity needed to get the job done? Get much better resolution than satellite photos. Accurately measure distance, height, pitch, and calculate available area. Design with confidence, knowing details that ultimately affect panel placement and output.

INSTALL WITH CONFIDENCE

Estimators don't like surprises, and neither do solar installers. Measureable aerial photos help you detect fine features and lessen change orders. Reduce costly time delays from idled crews – plan with clear, current Nearmap imagery and watch your performance soar.

- Dramatically increase daily lead volume
- Create clear proposals with current imagery
- Accurately forecast PV material & labor costs
- Reduce on-roof time and insurance risk

"We can decide if the property is suitable for solar within two to three minutes. The high-resolution captures reveal roof space, shading, and any obstructions."

— James Kennedy, Program Manager,
Sales Proposal Development
at Momentum Solar

YOUR COMPETITIVE ADVANTAGE

Improve planning, with fewer site visits. Quote and install faster than ever before. Frequently updated, high-resolution imagery helps increase both sales and profits.

QUALIFY FASTER

While on the first call, instantly access current views to verify specific features. Then review historical captures to reveal shading or other obstructions.

IDENTIFY EARLY OPPORTUNITIES

Fresh imagery is delivered to you within days of capture. Our historical archive and current imagery allow you to view change over time, and identify new developments when land is first cleared. Be the early bird, and deliver stunning proposals for new commercial or residential solar.

100%

CLOUD-BASED

Instant access from your desktop or mobile device.

MAPBROWSER OR API

Access is lightning fast from the cloud, and Nearmap imagery works within cutting-edge PV estimating software to streamline your entire sales and design process.
