

Instant Access, High-Resolution Aerial Imagery

You need a competitive edge. Instant access to high resolution aerial imagery directly from your desktop or mobile device provides that edge. Nearmap provides frequent updates for all major metropolitan areas with 100% cloud-based access. Users access Nearmap imagery through MapBrowser™ or through their existing GIS or CAD business and government applications.

Keep track of change over time

HIGH-RESOLUTION,
TIMELY IMAGERY WITH

\$0 INCREMENTAL
IT COST

- Instant access to US metro coverage areas
- Frequent updates
- 100% cloud-based
- GIS and CAD ready

“Before we used Nearmap, we struggled with outdated imagery that frankly missed the details. With Nearmap, we’ve reinvented the way we do business and it’s making all the difference”

– CEO –
US Engineering Firm

Frequent Updates–GIS & CAD Ready

Today, government and commercial organizations are using Nearmap every day to improve planning, reduce site visits, track change over time, prospect faster, sell more and reduce risk. With instant access to high resolution aerial imagery, users are applying Nearmap to make faster, more accurate decisions while saving time and resources.

Amazing High Resolution

Our imagery is better than 2.8” GSD—much clearer than satellite imagery—giving you unrivaled clarity, precision and detail.

Imagery Updated Regularly

We regularly update imagery within days of capture. See changes over time by comparing current and historical imagery.

Powerful Integration

Combine Nearmap’s spectacular imagery with powerful analytics using our simple and seamless integration with GIS and CAD tools.

100%
CLOUD-BASED

Instant access
from your desktop
or mobile device.

Easily access our current imagery using MapBrowser™

With Nearmap, users easily access our current imagery using MapBrowser™ or continue to use their existing GIS and CAD programs with our updated visual layer. No IT involvement is needed to combine tools and data layers allowing users to create visual models and presentations in spectacular detail. With very simple setup, Nearmap imagery can be integrated as a service or as static geo-referenced files.

See your world from a new perspective.

Current. Clear. Change.

Architecture, Construction, Engineering

Fierce competition means you need an edge. Today, progressive Architecture, Construction and Engineering firms are winning with instant access to Nearmap's high resolution aerial imagery. If you need better proposals, efficient planning and clear site inspections, we have the answer.

Utilities & Communications

Risk analysis, regulatory compliance and construction management continue to be high priorities for utilities and telecommunications. Reducing outages increases customer satisfaction. Current, high resolution aerial imagery showing change over time provides confidence and operational efficiency to get the job done. With Nearmap, turn the tables on infrastructure challenges and manage your opportunities with pinpoint precision.

Government

Whether you're involved in public safety, planning, environmental regulation, public works or compliance, current, clear aerial imagery allows you to support government staff and citizens with diplomacy and dispatch. Today, state and local governments are more efficient than ever before using Nearmap's high resolution PhotoMaps™.

Solar

Solar is helping transform the energy industry. Nearmap's high resolution aerial imagery is fueling that transformation. Today, solar companies are using Nearmap to prospect more efficiently, manage large projects remotely, develop breathtaking proposals and improve the design and implementation process.

Property Management and Real Estate

Property managers, developers and realtors are using Nearmap's high resolution aerial imagery because it shortens sales cycles, provides better service and educates the customer. Nearmap delivers current, complete, clear PhotoMaps™ - the competitive advantage you need to win in markets where innovation is essential.

Insurance & Financial Risk

When it comes to risk analysis, the details matter. Insurance companies focused on property & casualty, damage assessment, disaster prone areas and crime are using Nearmap's high resolution aerial imagery to deliver highly accurate insurance coverage and protect their policyholders.
