

# INCREASE REVENUE REDUCE EXPOSURE

Swiftly identify ground conditions, view historical change, and properly assess risk with HD aerial imagery.

## INSPECT PROPERTIES FASTER

How often are you stuck in traffic? With thorough aerial inspections, reduce your number of costly site visits while getting a clearer overall picture. Precisely measure property features, and quickly survey the surrounding area to dial in your valuation, all in a fraction of the time.

## STRENGTHEN UNDERWRITING

Scan entire neighborhoods in minutes to identify factors that may impact future claims. Then browse historical imagery for that location, indexed by exact place and time. Underwriters may ascertain individual risks, and actuaries may forecast future outlays to price policies accordingly.

## IMPROVE CLAIM MANAGEMENT

Resolve customer inquiries in real time with instant access to current and past aerial imagery. Verify specific features, and what's insurable remotely. You get unparalleled oversight, while accurate imagery helps strengthen customer communications and trust.

## DETECT WHAT CHANGED

View both current maps  
and all historical captures

- Minimize site visits with remote aerial inspection
- Verify claims, comparing current and past imagery
- Accelerate underwriting speed and accuracy
- Improve risk analysis to correctly price policies.

*"We need the best information and as much information as we can get about these properties. Nearmap is invaluable in that regard because of how current and detailed their imagery is of property."*

— Brian Garrison, Founder & President  
Retail Valuation Services

# YOUR COMPETITIVE ADVANTAGE

Inspect more, with far fewer site visits. Verify previous conditions within seconds. Frequently updated HD maps help increase both customer satisfaction and profits.

## REMOTELY VIEW MORE

High-resolution leaf-off aerial imagery clearly records events on the ground. Within seconds, see what's been built, modified, damaged or demolished.

## GET THE BIG PICTURE – NOW

Fresh imagery is delivered to you within days of capture. Our historical archive and current imagery allow you to observe change over time, identify worsening conditions, and view large swaths affected by natural or man-made disasters like hurricanes, tornadoes, floods, or wildfires.

**100%**  
CLOUD-BASED

Instant access from your desktop or mobile device.

## SEAMLESS INTEGRATION

Access is lightning fast from the cloud, and Nearmap imagery integrates with leading GIS platforms. Or access aerial images with MapBrowser™ and its intuitive toolset.
