

PLAN AND DESIGN WITH PRECISION

Frequently updated aerial maps are sharper than satellite, more reliable than drones, and multiply your efforts.

SPOT LANDSCAPE WORK

Scan entire neighborhoods in minutes. Initiate early contact with landowners or developers and win new business. Properties may be viewed from multiple angles, and our historical imagery archive shows additional landscaping perspective over time.

ESTIMATE WITH AUTHORITY

Design atop high-resolution imagery, and showcase your creativity as never before. Speed up your proposal process, and quote far more landscaping jobs per week. Precisely measure area, distance, and height. Stunning aerial imagery makes it real, and helps close your sale.

WORK THROUGH WINTER

Nearmap's updated imagery enables year-round lead generation, remote site inspections, breakthrough landscape architecture, and accurate estimating with snow-free imagery. Best of all, you can make the most of winter from your own (warm) office.

UP-TO-DATE IMAGERY

Frequent captures, often multiple times per year

- Minimize site visits with remote aerial inspection
- Verify land features and concept in real time
- Accelerate estimating speed and accuracy
- See both current and historical property views

"The ability to create site measurements from MapBrowser also has a two-fold benefit: you can create faster estimates for customers while reducing the number of site visits needed."

— Jill Odom, Total Landscape Care

YOUR COMPETITIVE ADVANTAGE

Verify truth on the ground within seconds. Estimate more, with far fewer site visits. Frequently updated HD maps help increase both customer satisfaction and profits.

REMOTELY VIEW MORE

High-resolution leaf-off aerial imagery clearly shows available area, building outlines, and helps landscape architects design with greater precision.

IDENTIFY EARLY OPPORTUNITIES

Fresh imagery is delivered to you within days of capture. Our historical archive and current imagery allow you to view change over time, and identify new developments when land is first cleared. Be the early bird, and deliver stunning proposals for new commercial or residential landscaping.

100%
CLOUD-BASED

Instant access from your desktop or mobile device

SEAMLESS INTEGRATION

Access is lightning fast from the cloud. View and measure within Nearmap's intuitive MapBrowser™, or integrate directly with leading GIS/CAD platforms.
